

## **CERRO DE PASCO RESOURCES INC.**

### **MANAGEMENT'S DISCUSSION AND ANALYSIS**

Three-month period ended

March 31, 2020

(First Quarter)

# MANAGEMENT'S DISCUSSION AND ANALYSIS

---

This management discussion and analysis ("MD&A") of Cerro de Pasco Resources Inc., ("Cerro de Pasco Resources" or "CDPR" or the "Company") (formerly known as Genius Properties Ltd.) follows rule 51-102 of the Canadian Securities Administrators regarding continuous disclosure.

The following MD&A is a narrative explanation, through the eyes of the management of Cerro de Pasco Resources, on how the Company performed during the three-month period ended March 31, 2020. It includes a review of the Company's financial condition and a review of operations for the three-month period ended March 31, 2020 as compared to the three-month period ended March 31, 2019.

This MD&A complements the condensed interim consolidated financial statements for the three-month period ended March 31, 2020 but does not form part of them. It is intended to help the reader understand and assess the significant trends, risks and uncertainties related to the results of operations and it should be read in conjunction with the condensed interim consolidated financial statements as at March 31, 2020 and related notes thereto as well as the audited annual consolidated financial statements, accompanying notes and Management's Discussion and Analysis for the year ended December 31, 2019.

The condensed interim consolidated financial statements for the three-month period ended March 31, 2020 and 2019 have been prepared in accordance with the International Financial Reporting Standards ("IFRS") applicable to the preparation of condensed interim consolidated financial statements. The accounting policies applied in the financial statements are based on IFRS issued and effective as at March 31, 2020. On May 28, 2020, the Board of Directors approved, for issuance, the condensed annual consolidated financial statements.

All figures are in Canadian dollars unless otherwise stated. Additional information relating to the Company can be found on SEDAR at [www.sedar.com](http://www.sedar.com). The shares of Cerro de Pasco Resources are listed on the Canadian Securities Exchange ("CSE") under the symbol "CDPR".

## REPORT'S DATE

The MD&A was prepared with the information available as at May 28, 2020.

## CAUTION REGARDING FORWARD-LOOKING INFORMATION

This MD&A contains forward-looking statements that are based on the Company's expectations, estimates and projections regarding its business, the mining industry in general and the economic environment in which it operates as of the date of the MD&A. To the extent that any statements in this document contain information that is not historical, the statements are essentially forward-looking and are often identified by words such as "anticipate", "expect", "estimate", "intend", "project", "plan" and "believe". In the interest of providing shareholders and potential investors with information regarding Cerro de Pasco Resources, including management's assessment of future plans and operations, certain statements in this MD&A are forward-looking and are subject to the risks, uncertainties and other important factors that could cause the Company's actual performance to differ materially from that expressed in or implied by such statements. Such factors include, but are not limited to: volatility and sensitivity to market metal prices, impact of change in foreign currency exchange rates and interest rates, imprecision in reserve estimates, environmental risks including increased regulatory burdens, unexpected geological conditions, adverse mining conditions, changes in government regulations and policies, including laws and policies; and failure to obtain necessary permits and approvals from government authorities, and other development and operating risks. The preliminary assessments contained in the Technical Report referred to in this MD&A, and the estimates contained therein to date are preliminary in nature and are based on a number of assumptions, any one of which, if incorrect, could materially change the projected outcome.

Although the Company believes that the expectations conveyed by the forward-looking statements are based upon information available on the date that such statements were made, there can be no assurance that such expectations will prove to be correct. The reader is cautioned not to rely on these forward-looking statements. The Company disclaims any obligation to update these forward-looking statements unless required to do so

# MANAGEMENT'S DISCUSSION AND ANALYSIS

---

by applicable Securities laws. All subsequent forward-looking statements, whether written or orally attributable to the Company or persons acting on its behalf, are expressly qualified in their entirety by these cautionary statements.

## NATURE OF ACTIVITIES

Cerro de Pasco Resources Inc. and its subsidiaries (hereafter the "Company" or "Cerro de Pasco Resources" or "CDPR") is a resource management company attuned to the most demanding environmental, social and legal compliance required by global institutions and investors. The key strategic strength of the Company is an unparalleled knowledge of the challenges and opportunities presented by the minerals endowment within the city of Cerro de Pasco combined with a highly experienced and practical team of both Peruvian and international management. The key focus of the Company will be on developing the El Metalurgista mining concession using world class geo-resource and industrial development solutions in order to secure long-term economic operational sustainability in harmony with a healthy and prosperous local population. The plan of the Company is to reprocess tailings and stockpiles at the Quiulacocha and Cerro de Pasco sites and also to revive and modernize all existing installations at the mining complex the "Project" or "Quiulacocha Project"

## BUSINESS DEVELOPMENT HIGHLIGHTS

- **Financing – Promissory note**

On February 6, 2020, the Company entered into a promissory note agreement with Alpha Capital Anstalt for USD \$300,000, which bears interest at 12% annually until the maturity date and 18% annually after the maturity date (April 2020). The Company may prepay the full principal amount plus any other sums due on this Note at any time without any penalty. If the Company completes a capital raise with gross proceeds of at least \$1,000,000, the Company shall pay off this Note within one business day of the closing of such financing raise. The promissory note is secured by personal guaranty from the Executive Chairman of the Board and the CEO.

- **Financing – Private placement**

On February 28, 2020, the Company concluded a private placement by issuing 1,291,000 units at a price of \$0.40 per unit for proceeds of \$516,400. Each unit consists of one common share and one warrant for a total of 1,291,000 common shares and 1,291,000 warrants. Each warrant will entitle the holder to acquire one additional common share of the Company at an exercise price until February 28, 2022. The Company may, at its option, accelerate the expiry date under certain conditions.

On March 6, 2020, the Company concluded a private placement by issuing 1,052,500 units at a price of \$0.40 per unit for proceeds of \$421,000. Each unit consists of one common share and one warrant for a total of 1,052,500 common shares and 1,052,500 warrants. Each warrant will entitle the holder to acquire one additional common share of the Company at an exercise price of \$0.65 until March 6, 2022. The Company may, at its option, accelerate the expiry date under certain conditions.

- **Amendment to the Transaction**

The Company and Volcan Compania Minera S.A.A have agreed to extend the closure date of CDPR's acquisition of the Cerro de Pasco Mine (the "Transaction"), to June 27<sup>th</sup>, 2020.

- **NI 43-101**

The Company has engaged international mining industry consulting firm, CSA Global Consultants Canada Ltd. ("CSA Global"), to complete a geological and Mineral Resource estimate review and audit at Cerro de Pasco and to complete a Technical Report on the resources included as part of the Transaction.

- **Environmental Audit**

The Company engaged Ausenco / Hemerra, to conduct an Environmental Audit for baseline operations as it relates to the Transaction.

# MANAGEMENT'S DISCUSSION AND ANALYSIS

---

- **Appointment of President and Director**

On March 9, 2020, the Company announced the appointment of Mr. Neil Ringdahl as president and director of the Company effective immediately.

Mr. Ringdahl is a mining executive with over 27 years of international operations and project experience in Latin America, Europe and Africa. Mr. Ringdahl has a strong technical background and previously worked with Volcan at Cerro de Pasco as the Corporate Project Manager, Orvana Minerals Corp. as COO, Apogee Silver as CEO, and is currently the COO at Ascendant Resources Inc where he has effectively doubled the metal production and reduced the cost of production by over 40% at its El Mochito Mine over the past three years. While at Orvana, he was successful in implementing programs to improve safety and profitability of its operations in Spain as well as increasing the life of its Bolivian operation by four years. At Apogee Silver, he held the position of Chief Executive Officer where he significantly de-risked the rehabilitation and construction at the Pulacayo mine in Bolivia while fostering proactive community relations improvements and reaching agreements to avoid nationalization of the assets. Mr. Ringdahl has also held senior positions with Golden Star Resources in West Africa, Anglo Platinum and AngloGold in South Africa. Mr. Ringdahl holds a bachelor's degree with Honors in mining engineering from the University of the Witwatersrand in South Africa.

Guy Goulet remains the Chief Executive Officer and Director of the Company

- **Other**

On March 30, 2020, the Company issued to service providers 30,000 common shares for business development consultancy.

- **COVID-19**

During March 2020, the COVID-19 pandemic has caused significant financial market and social dislocation. The situation is dynamic with various cities and countries around the world responding in different ways to address the outbreak. The Company assess the impact COVID-19 will have on its business activities. The extent of the effect of the COVID-19 pandemic on the Company is uncertain.

## **BUSINESS DEVELOPMENT SUBSEQUENT EVENTS**

- **Other**

On May 15, 2020, the Company issued to service providers 30,000 common shares for business development consultancy.

## **PROJECT DEVELOPMENT HIGHLIGHTS**

The Company continues to focus its efforts on further developing the Project. These efforts were focused on all areas of importance as summarized below:

- **Community relations**

The Company continued to spend a significant amount of time communicating the opportunities of the El Metalurgista Project to the two adjacent local communities, Quiulacocho and the human settlement of Champamarca. Community support is integral for the success of any project in Peru. The Company continued to spend capital and time effort in communicating all the benefits of the proposed project to the members of the community. This was achieved by production of materials highlighting those benefits, distribution of those materials to the local communities, one on one communication with relevant stakeholders of the communities and general assembly meetings with the community population at large. The Company also hosted several cultural activities, participated in several sponsorship opportunities, and donated miscellaneous items to the children attending school.

In September 2019, the Quiulacocho Community has voted decisively in favor of CDPR's tailings reprocessing plan. This represents a crucial step towards achieving the required social license and key

## MANAGEMENT'S DISCUSSION AND ANALYSIS

---

permits. Perhaps more important than any legal authorization, the landmark vote reinforces the Company's partnership with the communities. It enables CDPR to remove and reprocess mining waste at the famous Cerro de Pasco mine, and in doing so would provide an effective and practical environmental remediation solution with long-term economic and social benefits.

The decisive result was achieved on the 15<sup>th</sup> of September, 2019 at the General Assembly of the Community chaired by Mr. Miguel Baldeon Hermitaño and ratified on the 19<sup>th</sup> of September, 2019. Ninety Eight percent (98%) of the community members attending the event voted in favor of the CDPR's initiative. According to the count made by community officials, the ratification of the "Agreement to Support the Reprocessing Project of Mining Tailings" was approved by one hundred three (103) votes in favor, only three (3) against and zero (0) abstentions.

The community has agreed to assist CDPR, in the remediation of contamination specifically found in old tailings within the historical El Metalurgista Concession, through its removal & reuse. The Community of Quiulacocha owns an area of approximately 40 km<sup>2</sup> located in the area of influence of the El Metalurgista project.

Individual meetings with the representatives of the community of Quiulacocha, the human settlement of Champamarca, the Provincial Municipality of Cerro de Pasco, and the Municipality of Rancas are held on a regular basis to ensure a good information flow regarding the planned Quiulacocha exploration project and the acquisition of the Target Companies by CDPR. These meetings also serve as a platform to discuss other relevant issues, such as company policies, local development needs, and contract opportunities for local communities.

- **Government relations**

The Company continued to spend time and capital communicating the opportunities of the El Metalurgista Project to the local and national government of Peru. The company employed various consultants to produce technical materials, related to health, safety, environment and communities. The materials highlighted the opportunities of the project and the potential positive impact it will have on Cerro De Pasco.

- **Urban Plan – Partial and Staged Relocation Strategy**

The company stepped up its internal process to clearly define areas of the town of Cerro de Pasco that would be affected by future projects. A staged footprint plan will be prepared in consultation with expert urban planners and in due course communicated to local and national government to build consensus at the outset. This effort is essential to the long-term success of the project.

- **Environmental Impact Declaration**

On July 26, 2019, the Company presented an Environmental Impact Declaration (Declaración de Impacto Ambiental) (the "DIA") for the exploration of the Quiulacocha tailings deposit before the Peruvian Ministry of Energy and Mines for evaluation and approval.

The DIA is being updated by the certified environmental consultancy company called Julio Cesar Ingenieros y Consultores (JCI) and will be submitted to the Ministry of Energy and Mines in May 2020 for its review and approval. The expected approval date is June 2020.

The DIA provides the details and coordinates for the 40-hole Drilling Program that CDPR intends to carry out on its El Metalurgista concession located within the Quiulacocha tailings deposit. The Quiulacocha tailings deposit covers 115 hectares and is estimated to hold approximately 70 million tonnes of tailings which contain recoverable metals such as silver, zinc, lead, copper, gold and other strategic metals.

- **Formal Proposal to Peruvian Ministry of Energy and Mines**

Since the start of 2019, the Company has been in discussions with the legal department of the Peruvian Ministry of Energy and Mines (the "MINEM") with regards to finding the best legal mechanism for the State of Peru to grant the company with the tailings areas which surround the El Metalurgista concession. On July 26<sup>th</sup>, 2019 the Company provided MINEM with a formal proposal and legal remedy for the State

## MANAGEMENT'S DISCUSSION AND ANALYSIS

---

to grant the Company rights to the entire tailings area for the Company to conduct a comprehensive analysis and develop an effective retreatment and remediation plan. In this regard the Company has proposed to provide MINEM with an irrevocable performance guarantee with respect to the activities the Company plans to carry out on the surround tailings.

- **The Company's Commitments to Internationally-Accepted Industry Practices for Environmental, Community, Safety, Anti-Corruption, and Corporate Social Responsibility (CSR) Matters**

In the second quarter of 2019, the Company board of directors approved several policies related to Environment, Community, Safety, Anti-Corruption, and Corporate Social responsibility (CSR).

CDPR's key focus is the environmental remediation through the extraction of remaining valuable minerals from the stockpiles and deposits generated by previous local mining activities. CDPR endorses and conducts responsible mining practices. CDPR will utilize up-to-date technology and industrial development solutions to secure long-term economic sustainability and a healthy and prosperous local population at Cerro de Pasco.

CDPR clearly recognizes that the communities and the environments in which it operates in are inter-dependent and that it may be held accountable for any effects and potential consequences. The proper management of these inter-connecting activities is essential to the economic well-being of CDPR. Therefore, CDPR is totally committed to having first-rate programs for: protection of the environment; providing safe workplaces for its employees and contractors; responsibly and ethically managing our relationships with its Project stakeholders and in the local communities where it operates; and, ensuring that CDPR is one that readily accepts and promotes itself as following the principles of corporate social responsibility or CSR.

CDPR has a rigorous commitment to the principles of corporate social responsibility, anti-corruption ethics, sound environmental practices, safe working conditions for our employees, and positive community involvement in its Projects. To that end, CDPR has strong, formal policies on these matters, which conform to generally-accepted international standards, that have been formally adopted by the CDPR Board.

CDPR's development of the Cerro de Pasco Project will be guided by internationally-accepted core principles and strategic goals. As such, CDPR will be driven by the Principles of Performance (listed below) of the International Council on Mining and Metals (ICMM), a well-respected international organization dedicated to a safe, fair, and sustainable mining and metals industry. The ICMM is comprised of 26 of the world's leading mining and metals companies and 35 regional and commodities associations.

1. Apply ethical business practices and sound systems of corporate governance and transparency to support sustainable development;
2. Integrate sustainable development in corporate strategy and decision-making processes;
3. Respect human rights and the interests, cultures, customs and values of employees and communities affected by our activities;
4. Implement effective risk-management strategies and systems based on sound science and which account for stakeholder perceptions of risks;
5. Pursue continual improvement in health and safety performance with the ultimate goal of zero harm;
6. Pursue continual improvement in environmental performance issues, such as water stewardship, energy use and climate change;
7. Contribute to the conservation of biodiversity and integrated approaches to land-use planning;
8. Facilitate and support the knowledge-base and systems for responsible design, use, re-use, recycling and disposal of products containing metals and minerals;
9. Pursue continual improvement in social performance and contribute to the social, economic and institutional development of host countries and communities; and

# MANAGEMENT'S DISCUSSION AND ANALYSIS

---

10. Proactively engage key stakeholders on sustainable development challenges and opportunities in an open and transparent manner. Effectively report and independently verify progress and performance.

## Code of Business Conduct and Ethics

On November 15, 2019 the Company adopted a Code of Business Conduct and Ethics embodies our commitment to conduct our business according to the highest ethical standards.

CDPR success is built on a commitment to high standards of corporate governance, business conduct, and professional integrity. We conduct our business around the world in an ethical, honest and accountable manner and in accordance with applicable laws, rules and regulations. We value, and are committed to, transparency in our business practices, consistent with good commercial confidentiality. Our company is committed to the principles of Responsible Mining.

The CDPR Corporate Code of Business Conduct and Ethics outlines our obligations regarding: business integrity, labor practices, security, human rights, transparency, public disclosure, cultural heritage, avoiding conflicts of interest, avoiding insider trading, anti-fraud, and anti- corruption & anti-bribery, among others.

## CORPORATE OBJECTIVES FOR 2020

- Complete the acquisition of the Cerro de Pasco Mine with Volcan Compañía Minera S.A.A. (BVL:VOLCABC1)(“Volcan”) outlined in the press releases on March 31, 2020 and November 28, 2019, (the “Transaction”);
- Improve the efficiencies of the main operating assets contemplated in the Transaction, namely the oxide mining and leach processing plant and the two base metals concentrators currently treating stockpiles;
- Complete Mineral Resource Estimates of the business combination on completion of the Transaction. Specifically, the new NI43-101 Mineral Resource Estimates will include the following areas:
  - Oxides
  - Sulphides
  - Excelsior stockpile
  - Miraflores stockpile
  - Pyrite stockpile
  - Rumilliana stockpile
- Commence with the exploration of the Quiulacocha historical tailings deposit;
- Conduct metallurgical test work on the Quiulacocha tailings material;
- Complete an Environmental Audit for baseline operations; and
- Commence a post-transaction, dual-listing process to the TSX-V/TSX and BVL (Lima) Stock Exchanges.

## CURRENT PROJECTS

### Cerro De Pasco

- Cerro de Pasco is one of the oldest and largest polymetallic mines in the world, operating for almost 400 years.
- The Quiulacocha tailings facility contains approximately **79MT of processable mineral**, from the Cerro de Pasco mining complex.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

- The Excelsior Stockpile, likewise, from the mine, contains **104MT with an estimated 43Mt** of mineral that could be processed at nearby concentrators Paragsha and San Expedito.
- Currently, these facilities are working well below installed capacity and efficiency and therefore, the possibility exists for either a tolling agreement or an acquisition of all processing facilities at Cerro de Pasco

### The Excelsior Mineral Pile and Quiulacocha Tailings

The Excelsior property consists of the Excelsior Mineral Pile ("EMP") and Quiulacocha Tailings ("QT") which are residues generated by the processing of the Cerro de Pasco Mine Pb-Zn-Ag-Cu ore located 310 km from Lima, in east-central Peru.

The Cerro de Pasco mine became one of the world's richest silver producing regions after base and precious metals were discovered in 1630. The EMP left from the mine operations contains an estimated 104Mt of which an estimated 43Mt can be economically processed and the QT contains 79Mt of which an estimated 79Mt could be economically processed. Cerro de Pasco Resources Inc. through its Peruvian Branch, Cerro de Pasco Resources Sucursal del Peru, owns 100% of the mineral rights of the El Metalurgista Concession, where the EMP and QT are located.

The Excelsior stockpile has been extensively explored by RC drilling, trenching and tested through metallurgical test work programs.

The EMP occupies an area of 94 ha and contains 26,400,000 m<sup>3</sup> of fragmentary rocks forming terraces composed of sulfide-rich rocks, sericitized volcanic and carbonate (dolomitic) rocks. Metal-bearing minerals consist of sphalerite (Zn), tennantite (Cu), cerussite (Pb), enargite (Cu) and galena (Pb, Ag-rich). The more reliable Historical Resources Estimate generated 42.89 Mt @ 0.09 wt. % Cu (85.1 M lb), 0.73 wt. % Pb (690.3 M lb), 1.59 wt. % Zn (1696.1 M lb) and 66.1 g/t Ag (91.1 M oz) with Pb+Zn= 2.33 wt. %\*.

The QT cover a surface of 114 ha and contain approximately 79 Mt of pyrite-bearing tailings of two different types: Cu-rich and Zn-Pb-rich sulphides. The best Historical Resources Estimate generated a total of 2.94 Mt @ 43.1 g/t Ag (4.1 M oz), 418 ppm Cu, 0.79 wt. % Pb (51.2 M lb) and 1.43 wt. % Zn (92.7 M lb)\*.

Satellite view of the Cerro de Pasco area showing the ancient Raul Rojas open pit and the Quiulacocha Tailing (QT) and Excelsior Mineral Pile (EMP).

# MANAGEMENT'S DISCUSSION AND ANALYSIS

---

\* The estimates presented above are treated as historic information and have not been verified or relied upon for economic evaluation by the Issuer or the writer. These are considered historical Mineral Resources and do not refer to any category of sections 1.2 and 1.3 of the NI-43-101 Instrument such as Mineral Resources or Mineral Reserves as stated in the 2010 CIM Definition Standards on Mineral Resources and Mineral Reserves. The explanation lies in the inability by the authors to verify the data acquired by the various historical drilling campaigns and other sampling works. The authors have read the documents pertaining to the description of the different methods used in the historical evaluation of the Mineral Resources. The Issuer has not done sufficient work yet to classify the historical estimates as current Mineral Resources or Mineral Reserves. Therefore, the Issuer is in the opinion that the above quoted resources for the EMP and QT cannot be relied upon.

## **Our Business Plan**

The plan of the Company is to reprocess tailings and stockpiles at Cerro de Pasco and to use these to revive and modernise all existing installations at the mining complex.

The pit still holds significant reserves and resources. The current political, social and economic climate in Peru creates a positive platform from which the Company can execute its vision for a fully integrated and multi-dimensional economic rehabilitation of all of the current and legacy minerals assets around the city of Cerro de Pasco. Cerro de Pasco Resources continues to advance a dialogue with leading experts on mineral waste recycling and site remediation with the aim of achieving an ambitious “zero waste” solution and the creation of a Circular Economy for the city of Cerro de Pasco. The Company has received encouraging signals from multiple levels of the Peruvian Ministry of Energy and Mines beckoning an intensive exploration and development phase starting in 2019.

## **Our Concept Proposal**

*“SUSTAINABLE DEVELOPMENT OF THE CERRO DE PASCO COMPLEX TOWARDS A MODERN ZERO WASTE OPERATION”*

The future of Cerro de Pasco will depend on the application of the latest science in geo-resource and industrial development. The town's history has, until now depended entirely on conventional “dirty” mining of commodity metals. However, new science can secure long-term economic sustainability in harmony with a healthy and prosperous local population. The initial objective of this project will be to drive the productive utilization of all material resources available at Cerro de Pasco and new industrial activities that will further perpetuate prosperity into the future. To achieve a series of objectives, CDPR will need to start by integrating all its resources and introducing techniques to reprocess all tailings and stockpiles contained within the entire complex.

The Concept starts with a complete exploration of the potential of the resources present at Cerro de Pasco and their current impact on the environment (to include a Baseline study of the entire Cerro de Pasco Watershed). It also includes the development of a sustainable inline extraction process towards the elimination of all waste. This implies a search for and separation of critical elements like Rare Earth Elements (REE), Platinum Group Elements (PGE) and other strategic elements (Ge, In, Ga) as well research and innovation to use of the main volume of the known waste material (pyrite, carbonates, and silicates). An example is the innovative exploitation of the heat capacity of pyrite for home heating systems for the population of Cerro de Pasco. Additionally, a new concept for the sustainable urban development of Cerro de Pasco will be created to strengthen the social impact by providing better living conditions for the whole population of Cerro de Pasco. This implies the attraction of secondary industries drawing benefit from the entire range of geo-resources present at Cerro de Pasco (including classical commodities (Pb, Zn, Ag, Bi, Cu, Au) as well as innovative commodities (including pyrite, carbonate, silicates).

The positive impacts will be immense in terms of job creation, poverty reduction and quality of life at Cerro de Pasco, a city with over 50,000 inhabitants and a unique history in, and loyalty to mining. CDPR will promote a broad spectrum of initiatives including urban re-planning, health and welfare in collaboration with the local and national authorities. Under the initial plan, households will be relocated from the most heavily contaminated areas. Cerro De Pasco Resources can therefore become the nucleus for sustainable growth,

# MANAGEMENT'S DISCUSSION AND ANALYSIS

renewing the site's ageing infrastructure and plant and employing the latest technologies to create an emblematic project.

## Exploration outlook

As part of the next steps in the development of the project, the Company will first need to update the historical Mineral Resource Estimates performed on the QT and EMP to render them compliant with the NI43-101 and CIMM norms. Regarding the EMP Resource Estimate, re-sampling of the 2009 RC drill holes (if retrievable) and pits, and sinking of twin holes will be necessary. The upgrading to Indicated or Measured Mineral Resources may also require additional RC drill holes to tighten the spacing which currently sits at 30 to 50 m. Note the QT Mineral Resource Estimates concerns about 225,000 m<sup>2</sup> of tailings area; less than half of the total surface. The Company is evaluating a sonic drilling program to expand the QT resources.

In addition, CSA Global Consultants Canada Ltd has been commissioned by Cerro de Pasco Resources Inc. to validate the Mineral Resource estimates provided by Volcan Compañía Minera and to generate CDPR's Mineral Resource Statement. As of April 2020, CSA has completed the site visits and is currently reviewing the Mineral Resource estimates.

## QUALIFIED PERSON

Dr. Michel Boily P.Ge, is the qualified person under NI 43-101 who has reviewed and approved the technical information contained in this document for the Canadian and Peruvian properties.

## FINANCIAL INFORMATION

### Functional and presentation currency

These selected quarterly financial information and other financial information are presented in Canadian dollars, the Company's functional currency.

### IFRS Accounting policies

The Company's significant accounting policies under IFRS are disclosed in Note 5 in the audited annual consolidated financial statements for the year ended December 31, 2019.

### Use of estimates and judgements

Please refer to Note 3.5 of the 2019 audited annual consolidated financial statements for an extended description of the information concerning the Company's significant judgments, estimates and assumptions

# MANAGEMENT'S DISCUSSION AND ANALYSIS

---

that have the most significant effect on the recognition and measurement of assets, liabilities, income and expenses.

## Reporting global event

During the three-month period ended March 31, 2020, the COVID-19 outbreak was declared a pandemic by the World Health Organization. The situation is dynamic and the ultimate duration and magnitude of the impact on the economy, capital markets and the Company's financial position cannot be reasonably estimated at this time. The Company is monitoring developments and will adapt its business plans accordingly. The actual and threatened spread of COVID-19 globally could adversely impact the Company's ability to carry out its plans and raise capital.

## Changes in accounting policies

The Company's changes to accounting policies are disclosed in Note 4.1 in the condensed interim consolidated financial statements for the three-month period ended March 31, 2020.

## New standards and interpretations that have not yet been adopted

The information is provided in Note 4.2 of the condensed interim consolidated financial statements for the three-month period ended March 31, 2020.

## Reverse takeover

The information is provided in Note 6 in the audited annual consolidated financial statements for the year ended December 31, 2019.

## Dividends

Since its incorporation, the Company has not paid any cash dividends on its outstanding common shares. Any future dividend payment will depend on the Company's financial needs to fund its exploration programs and its future growth, and any other factor that the Board may deem necessary to consider. It is highly unlikely that any dividends will be paid in the near future.

## SELECTED QUARTERLY FINANCIAL INFORMATION

Cerro de Pasco Resources anticipates that the quarterly and annual results of operations will primarily be impacted for the near future by several factors, including the timing and efforts of the exploration's expenditures and efforts related to the development of the Company. Due to these fluctuations, the Company believes that the quarter to quarter and the year-to-year comparisons of the operating results may not be a good indication of its future performance.

The following selected quarterly financial information is derived from our unaudited condensed annual financial statements for each of the two most recently completed financial years.

The net loss of \$793,872 for Q1-2020 is attributable to general and administrative expenses of \$1,095,260 combined with an exchange gain \$384,901.

The net loss of \$1,108,820 for Q4-2019 is attributable to general and administrative expenses of \$980,676.

The net loss of \$714,829 for Q3-2019 is attributable to general and administrative expenses of \$646,745.

The net loss of \$944,219 for Q2-2019 is attributable to general and administrative expenses of \$851,506.

The net loss of \$2,330,496 for Q1-2019 is mostly attributable to the grant of 5,450,000 share options to directors, officers, consultants and an employee which the fair value was estimated at \$1,337,905.

The net loss of \$14,385,457 for Q4-2018 is attributable to listing costs expenses of \$13,754,103 related to the RTO of October 5, 2018.

The net loss of \$491,534 for Q3-2018 is attributable to general and administrative expenses of \$474,702.

The net loss of \$375,988 for Q2-2018 is attributable to general and administrative expenses of \$359,534.

# MANAGEMENT'S DISCUSSION AND ANALYSIS

---

## Results of operations for the three-month period ended March 31, 2020

### **Net loss**

The basic and diluted loss per share for the three-month period ended March 31, 2020 is \$0.00 as compared to \$0.01 for the three-month period ended March 31, 2019.

During the three-month period ended March 31, 2020, the Company realized a net loss of \$793,872 as compared to a net loss of \$2,330,496 for the three-month period ended March 31, 2019.

The significant decrease of \$1,536,624 for the three-month period ended March 31, 2020 as compared to Q1-2019 in net loss is attributable to a significant decrease of \$1,219,609 in operating expenses (\$1,095,260 in Q1-2020 compared to \$2,314,869 in Q1-2019).

### **Operating expenses**

During the three-month period ended March 31, 2020, operating expenses were \$1,095,260 as compared to \$2,314,869 for the three-month period ended March 31, 2019.

The decrease of \$1,219,609 for the three-month period ended March 31, 2020 as compared to Q1-2019 in operating expenses is attributable to a decrease of \$1,337,905 in share-based compensation (\$Nil in Q1-2020 compared to \$1,337,905 in Q1-2019).

### **Other expenses (revenues)**

During the three-month period ended March 31, 2020, the other revenues were \$301,388 as compared to other expenses of \$15,627 for the three-month period ended March 31, 2019.

The significant decrease of \$317,015 for the three-month period ended March 31, 2020 as compared to Q1-2019 in other expenses is attributable to an increase in exchange gain of \$390,528 (\$384,901 in exchange gain for the three-month period ended March 31, 2020 as compared to \$5,627 in exchange loss for the three-month period ended March 31, 2019).

## CASH FLOWS

### **Cash flows used for operating activities**

Cash flows used for operating activities were \$548,339 during the three-month period ended March 31, 2020, a decrease of \$323,251 as compared to cash flows of \$871,590 from operating activities during the three-month period ended March 31, 2019. The decrease of \$323,251 in cash flows used for operating activities is mostly explained by a decrease of \$194,386 in cash flows used for operating activities before changes in working capital (negative cash flows of \$683,412 for the three-month period ended March 31, 2020 as compared to negative cash flows of \$877,798 for the three-month period ended March 31, 2019) combined with an increase of \$128,865 in cash flows from change in working capital (positive cash flows of \$135,073 for the three-month period ended March 31, 2020 as compared to positive cash flows of \$6,208 for the three-month period ended March 31, 2019).

### **Cash flows from financing activities**

Cash flows from financing activities were \$1,312,323 during the three-month period ended March 31, 2020, an increase of \$1,175,098 as compared to cash flows of \$137,225 from financing activities during the three-month period ended March 31, 2019.

The increase of \$1,175,098 is mostly attributable to an increase of \$815,587 from the proceeds from private placements and from warrants exercised (\$961,400 for the three-month period ended March 31, 2020 as

# MANAGEMENT'S DISCUSSION AND ANALYSIS

---

compared to \$145,813 for the three-month period ended March 31, 2019) combined with an increase of \$399,570 from proceeds from promissory note (\$399,570 for the three-month period ended March 31, 2020 as compared to \$Nil for the three-month period ended March 31, 2019).

## **Cash flows used for investing activities**

Cash flows used for investing activities were \$54,190 (acquisition of property and equipment and mining property) during the three-month period ended March 31, 2020, an increase of \$54,190 as compared to cash flows of \$Nil used for investing activities during the three-month period ended March 31, 2019.

## **OTHER FINANCIAL DISCLOSURES**

### **Related party transactions**

Please refer to Note 13 of the condensed interim consolidated financial statements for the three-month period ended March 31, 2020, for a summary of the Company's transactions with related parties.

### **Commitments and contingency**

Please refer to Note 17 and 18 of the condensed interim consolidated financial statements for the three-month period ended March 31, 2020, for a summary of the Company's commitments and contingencies.

### **Subsequent events**

Please refer to Note 19 of the condensed interim consolidated financial statements for the three-month period ended March 31, 2020, for a summary of the Company's subsequent events.

### **Off-financial position arrangements**

As at March 31, 2020, the Company had no off-financial position arrangements.

### **Going concern assumption**

The accompanying consolidated financial statements have been prepared on the basis of the on going concern assumption meaning the Company will be able to realize its assets and discharge its liabilities in the normal course of business. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, 12 months from the end of the reporting period.

Management is aware, in making its assessment, of material uncertainties related to events and conditions that may cast a significant doubt on the Company's ability to continue as a going concern and, accordingly, the appropriateness of the use of accounting principles applicable to a going concern. These financial statements do not reflect the adjustments to the carrying values of assets and liabilities, expenses and financial position classifications that would be necessary if the going concern assumption was not appropriate. These adjustments could be material.

For the three-month period ended March 31, 2020, the Company recorded a net loss of \$793,872 (\$2,330,496 for the three-month period ended March 31, 2019) and has an accumulated deficit of \$23,305,545 as at March 31, 2020 (\$22,511,673 as at December 31, 2019). Besides the usual needs for working capital, the Company must obtain funds to enable it to meet the timelines of its exploration programs and to pay its overhead and administrative costs. As at March 31, 2020, the Company had a negative working capital of \$667,700 (a negative working capital of \$340,142 as at December 31, 2019) consisting of cash and cash equivalents of \$609,674 (\$275,466 as at December 31, 2019). Management believes that these funds will not be sufficient to meet the obligations and liabilities of the Company. These uncertainties

# MANAGEMENT'S DISCUSSION AND ANALYSIS

cast significant doubt regarding the Company's ability to continue as a going concern. Any funding shortfall may be met in the future in a number of ways, including but not limited to, the issuance of new equity instruments. Given that the Company has not yet determined whether its mineral properties contain mineral deposits that are economically recoverable, the Company has not yet generated income nor cash flows from its operations. The recovery of the cost of exploration and evaluation assets as well as other tangible and intangible assets, is subject to certain conditions: the discovery of economically recoverable reserves, the ability of the Company to obtain the necessary financing to continue the exploration, evaluation, development, construction and ultimately disposal of these assets. During the three-month period ended March 31, 2020, the Company has raised \$961,400 from warrants exercised and private placements consisting of common shares to fund exploration works and working capital (\$2,668,332 during the year ended December 31, 2019). While management has been successful in raising financing in the past, there is no assurance that it will succeed in obtaining additional financing in the future.

## Capital management policies and procedures

The Company's capital management objectives are to ensure its ability to continue as a going concern and to maximize the return of its shareholders. The Company's definition of capital includes all components of equity. Capital for the reporting periods under review is summarized in Note 15 and in the condensed interim consolidated statement of changes in equity in the condensed interim consolidated financial statements for the three-month period ended March 31, 2020. In order to meet its objectives, the Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. The Company finances its exploration and evaluation activities principally by raising additional capital either through private placements or public offerings. When financing conditions are not optimal, the Company may enter into option agreements or other solutions to continue its exploration and evaluation activities or may slow its activities until conditions improve. No changes were made in the objectives, policies and processes for managing capital during the reporting periods.

## Disclosure of outstanding share data

# MANAGEMENT'S DISCUSSION AND ANALYSIS

---

## RISK AND UNCERTAINTIES

Cerro de Pasco Resources is subject to a variety of risks, some of which are described below. If any of the following risks occur, the business, results of operations or financial condition could be adversely affected in a material manner.

### Financial instrument risks

Please refer to Note 16 of the condensed interim consolidated financial statements for the three-month period ended March 31, 2020 for a summary of the Company's financial instruments risks.

### COVID-19

The COVID-19 pandemic is causing significant financial market and social dislocation. The situation is dynamic with various cities and countries around the world responding in different ways to address the outbreak. The Company continues to assess the impact COVID-19 will have on its business activities. The extent of the effect of the COVID-19 pandemic on the Company is uncertain.

### Certain Risks associated with the Quiulacocha Tailings and Excelsior Stockpile

Cerro de Pasco Resources will be solely focused on the exploration and development of the Property. Cerro de Pasco has initiated negotiations with local stakeholders for gaining access to a portion of the surface lands that Cerro de Pasco Resources will require for processing the tailings, dumps and slag to which Cerro de Pasco's "El Metalurgista" concession entitles it to. It is the intention of Cerro de Pasco Resources to pursue the negotiations and reach an agreement with local stakeholders. There is however no guarantee that such an agreement will be reached. Unless Cerro de Pasco Resources acquires additional property interests, any adverse developments affecting the Property could have a material adverse effect upon Cerro de Pasco Resources and would materially and adversely affect any profitability, financial performance and results of operations of Cerro de Pasco Resources.

### Exploration and mining risks

The Company is engaged in the business of acquiring and exploring mineral properties in the hope of locating economic deposits of minerals. The Company's property interests are in the exploration and evaluation stage only. The business of mineral exploration involves a high degree of risk. Few properties that are explored are ultimately developed into production. Currently, there are no known bodies of commercial ore on the mineral properties of which the Company owns an interest. Accordingly, there is little likelihood that the Company will realize any profits in the short to medium term. Any profitability in the future from the Company's business will be dependent upon locating an economic deposit of minerals. However, there can be no assurance, even if an economic deposit of minerals is located, that it can be commercially mined.

Unusual or unexpected formations, fires, power outages, labour disruptions, flooding, cave-ins, landslides and the inability to obtain suitable or adequate machinery, equipment or labour are other risks involved in the conduct of exploration programs.

The economics of developing mineral properties is affected by many factors including the cost of operations, variation of the grade of ore mined and fluctuations in the price of any minerals produced. There are no underground or surface plants or equipment on the Company's mineral properties, nor any known body of commercial ore. Programs conducted on the Company's mineral property would be an exploratory search for ore.

### Titles to property

While the Company has diligently investigated title to the various properties in which it has interest, and to the best of its knowledge, title to those properties are in good standing, this should not be construed as a

# MANAGEMENT'S DISCUSSION AND ANALYSIS

---

guarantee of title. The properties may be subject to prior unregistered agreements or transfer, or native or government land claims, and title may be affected by undetected defects.

## **Permits and licenses**

The Company's operations may require licenses and permits from various governmental authorities. There can be no assurance that the Company will be able to obtain all necessary licenses and permits that may be required to carry out exploration, development and mining operations at its projects.

## **Metal prices**

Even if the Company's exploration programs are successful, factors beyond the control of the Company may affect marketability of any minerals discovered. Metal prices have historically fluctuated widely and are affected by numerous factors beyond the Company's control, including international, economic and political trends, expectations for inflation, currency exchange fluctuations, interest rates, global or regional consumption patterns, speculative activities and worldwide production levels. The effect of these factors cannot accurately be predicted.

## **Competition**

The mining industry is intensely competitive in all its phases. The Company competes with many companies possessing greater financial resources and technical facilities than itself for the acquisition of mineral interests as well as for recruitment and retention of qualified employees.

## **Environmental regulations**

The Company's operations are subject to environmental regulations promulgated by government agencies from time to time. Environmental legislation provides for restrictions and prohibitions of spills, release or emission of various substances produced in association with certain mining industry operations, such as seepage from tailing disposal areas, which could result in environmental pollution. A breach of such legislation may result in imposition of fines and penalties. In addition, certain types of operations require submissions to and approval of environmental impact assessments. Environmental legislation is evolving in a manner which means stricter standards and enforcement, fines and penalties for non-compliance are more stringent. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has a potential to reduce the profitability of operations. The Company intends to fully comply with all environmental regulations.

## **Conflicts of interest**

Certain directors or proposed directors of the Company are also directors, officers or shareholders of other companies that are similarly engaged in the business of acquiring, developing and exploiting natural resource properties. Such associations may give rise to conflicts of interest from time to time. The directors of the Company are required by law to act honestly and in good faith with a view to the best interests of the Company and to disclose any interest which they may have in any project or opportunity of the Company. If a conflict of interest arises at a meeting of the board of directors, any director in a conflict will disclose his interest and abstain from voting on such matter. In determining whether or not the Company will participate in any project or opportunity, the directors will primarily consider the degree of risk to which the Company may be exposed and its financial position at that time.

# MANAGEMENT'S DISCUSSION AND ANALYSIS

---

## Stage of development

The Company's properties are in the exploration stage and to date none of them have a proven ore body. The Company does not have a history of earnings or providing a return on investment, and in future, there is no assurance that it will produce revenue, operate profitably or provide a return on investment.

## Industry conditions

Mining and milling operations are subject to government regulations. Operations may be affected in varying degrees by government regulations such as restrictions on production, price controls, tax increases, expropriation of property, pollution controls or changes in conditions under which minerals may be mined, milled or marketed. The marketability of minerals may be affected by numerous factors beyond the control of the Company, such as government regulations. The effect of these factors cannot be accurately determined.

## Uninsured risks

The Company's business is subject to a number of risks and hazards, including environmental conditions adverse, environmental regulations, political uncertainties, industrial accidents, labour disputes, unusual or unexpected geological conditions, ground or slope failures, cave-ins, and natural phenomena such as inclement weather conditions, floods and earthquakes. Such occurrences could result in damage to mineral properties or production facilities, personal injury or death, environmental damage to the Company's properties or the properties of others, delays in mining, monetary losses and possible legal liability.

## Capital needs

The exploration and evaluation, development, mining and processing of the Company's properties may require substantial additional financing. The only current source of future funds available to the Company is the sale of additional equity capital and the borrowings of funds. There is no assurance that such funding will be available to the Company or that it will be obtained on terms favourable to the Company or will provide the Company with sufficient funds to meet its objectives, which may adversely affect the Company's business and financial position.

In addition, any future equity financings by the Company may result in a substantial dilution of the existing shareholders. Failure to obtain sufficient financing may result in delaying or indefinite postponement of further exploration and evaluation, development or production on any or all of the Company's properties or even a loss of property interest.

## Key employees

Management of the Company rests on a few key officers and members of the Board of Directors, the loss of any of whom could have a detrimental effect on its operations. The development of the Company's business is and will continue to be dependent on its ability to attract and retain highly qualified management and mining personnel. The Company faces competition for personnel from other employers.

## Canada Customs and Revenue Agency

No assurance can be made that Canada Customs and Revenue Agency will agree with the Company's characterization of expenditures as Canadian exploration expenses or Canadian development expenses or the eligibility of such expenses as Canadian exploration expenses under the *Income Tax Act* (Canada).

## CERTIFICATION OF INTERIM FILINGS

The President and Chief Executive Officer and the Chief Financial Officer have signed the Basic Certifications of Interim Filings as required by National Instrument 52-109 for venture issuer, thus confirming, the review, the absence of misrepresentations and the fair presentation of the interim filings.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

---

- The President and Chief Executive Officer and the Chief Financial Officer confirm to have reviewed the interim financial report and the interim MD&A (together, the "interim filings") of the Company for the three-month period ended March 31, 2020.
- Based on their knowledge, having exercised reasonable diligence, the President and Chief Executive Officer and the Chief Financial Officer confirm that the interim filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, for the period covered by the interim filings.
- Based on their knowledge, having exercised reasonable diligence, the President and Chief Executive Officer and the Chief Financial Officer confirm that the interim financial report together with the other financial information included in the interim filings fairly present in all material respects the financial condition, financial performance and cash flows of the issuer, as of the date of and for the period presented in the interim filings.
